## MAN WHO HAS TRIED IT WRITES ABOUT THE HIGH COST OF LIVING

The Star-Bulletin has received the following communication and prints it exactly as received, minus the picturesque chirography:

**THE HIGH COST OF LIVING.**  
I am hereby make a law according to the Bible.

And all because people do not practice what they preach.

I will make the feller what owns the land go and live on it.

I will make the feller what owns the mines go and dig the coal.

I will make the feller what owns the lumber use it.

I will make the feller what owns the meat combine eat there meat, and the feller what owns the eggs combine eat there eggs.

I will make the feller who owns the wheat combine eat all the bread.

And the feller what owns the big clothing stores wear all the clothing, especially the coats because the bible says explicitly no man shall have more than one coat and if he has two coats, that he shall give one to his neighbor.

Now I know that you can not make

people take presents. Not any more than when you lead a horse to water could make him drink. Now listen what a feller told me that I ought to do. He said you understand farming. If I was you I would go out on a farm. There is where farmers belong on the farm. He said, because we have hard times and high cost of living everybody lived in town. So I said that so, and I said I am from Missouri, show me. So I went out to a sugar farm and the plantation bull dog snarled Kapu. I tried at the pineapple ranch where a muf Putting Pug flew at my pants Kapu.

finely the land agent feched up at Kimuki with me where he wanted me to buy a chicken ranch. did you ever here of such thing in bibical times. In those times they use to have brothers to give things to. I ask the agent why he didnt have any land on his chicken ranch? Well he laught; and I had to laugh with him to keep him company. I thot if I had more of any one thing than I needed I could devide it with my brother. But he did not do unto me

as I did unto him he kept his lots.

Well them chicken lots they are the right dope there is not anymore land on them, than what you find in the

craw fish holes what they left when they got through with them then as a matter of course when thies holes

got, lonesome for something to do they filled themselves up with dirt.

The agent he is a very nice feller he told me that this dirt could be

cleaned out and I could stick my posts in them and stretch my wire up, and have a fence in a hurry. he said

that I could take the loose rocks and fill up the deep places between the

posts and fill up the cracks with dead take a little Pape's Diapiesin and in
